Vol. 259, No. 24, Issue of December 25, pp. 15633–15689, 1984

KEYWORD INDEX

The Keyword Index for this volume has been compiled and photocomposed by the Chemical Abstracts Service Division of the American Chemical Society

A
RNA binding protein proximity ribosome 9971
Abalone
calcium transport sperm methylxanthine 5514
sperm calmodulin stimulated adenylate cyclase 7590
Absorption
sodium colon glucocorticosteroid receptor 1186
spectra hydroxylamine oxidase 6833
Acanthamoeba
myosin ATPase active phosphorylation site 14184
myosin heavy chain mRNA 11157
myosin I heavy chain kinase 3224
myosin II ATPase effector interdependence 9302
myosin II heavy chain sequence 12781
myosin II limited proteolysis 9308
Acetaminophen
analog metab oxidn 10284
Acetate
formation corrinoid protein Clostridium 8892
metab Escherichia carbon flux 9646
Acetoacetate
metab regulation cholesterogenesis 14548
precursor liver gluconeogenesis 7525
Acetoacetyl
CoA reductase liver microsome 7460
CoA synthetase regulation cholesterogenesis 14548
Acetobacterium
methylenetetrahydrofolate dehydrogenase 3499
Acetolactate
synthase Salmonella sulfometuron methyl 8753
Acetone
metab 231
Acetyl
fatty acid synthetase mechanism 134
low density lipoprotein metab liver 8898
Acetylated
histone HMG-17 protein polynucleosome 699
Acetylation
histone H4 embryo Arbacia 13458
Acetylcholine
phosphatidylinositol metab pancreas lithium 4346
receptor binding site 11662
receptor bioluminescent probe brain 2055
receptor iodine labeled bungarotoxin 14033
receptor lipid membrane 9188
receptor monoclonal antibody bungarotoxin 15051
receptor Naja toxin method 5717
receptor subunit lipid 5364
receptor Torpedo binding bungarotoxin 11512
Acetylcholinesterase
form metab neuroblastoma 3703
hydrophobic domain erythrocyte 5653
intermediate detn Electrophorus 11010
membrane bound form brain chicken 13186
structure erythrocyte human 5643
Acetylcysteine
isoactin intermediate smooth muscle 7224
Acetylene
dopamine hydroxylase 15017
Acetylenic
fatty acid inactivation hydroxylase 4136
Acetylgalactosamine
lymphocyte surface phenotype 3308
residue oligosaccharide cytotoxic T lymphocyte 12528
sulfate isomerization multienzyme system 6403
Acetylgalactosaminyltransferase
deficiency lymphocyte mutant 12536
globotriaosylceramide spleen 5637
Acetylglucosamine
galactosyltransferase branch specificity Golgi app 4716
galactosyltransferase parotid gland isoproterenol 5797 14315
galactosyltransferase trachea 8045
Acetylglucosaminidase
sequence Streptomyces 7577
Acetylglucosaminylphosphotransferase
lysosome enzyme recognition 14663
Acetylglucosaminyltransferase
glycopeptide CHO ricin resistance 13370
glycosphingolipid formation lymphoma 12557
stomach mucosa 13385
Acetylglyceryl
ether phosphorylcholine liver glycogenolysis 1468
ether phosphorylcholine phosphatidylinositol glycogenolysis 8685
Acetylhexosaminidase
ganglioside hydrolysis sialate modification 5409
Acetyllactosamine
sequence asparagine oligosaccharide lymphoma 6253
Acetyltransferase
arylalkylamine arylamine pineal 10913
carnitine liver peroxisome 13089
histone liver nucleus 3413
histone multiple form nucleus liver 8372
histone Saccharomyces chromatin 14406
kanamycin kinetics mechanism 12543
platelet activating factor eosinophil 5526
spermine spermidine induction rat 12364
Acetytransferase
choline multiple form brain placenta 1253
Achlya
steroid receptor 15324
Acid
base equil liver urea 1552
pH myofilament ATPase troponin 3181
phosphatase Saccharomyces 878
phosphatase stereochem prostate 2208
protease Cladosporium crystal structure 1251
secretion gastric chloride conductance 14952
Acidification
clathrin coated vesicle duramycin 2701
Acidosis
sodium proton exchange kidney 13224
Aconitase
iron sulfur cluster MCD 2274
iron sulfur cluster sulfide exchange 3145
mol wt stoichiometry heart 3141
unfolding iron sulfur cluster structure 14463
Acrosin
sperm Halocynthia 2900
Acrosome
reaction sperm membrane potential 13914
Acrylochlorin
heme d1 structure 1577
ACTH
adenylate cyclase forskolin resistance 5376 9965
corticosteroid formation adrenal 10159
methylation protein methyltransferase isoaspartate 10714
phospholipid adrenal mitochondria 10745
protein kinase adrenal cortex 3403
secretion CRF cAMP 10296
steroidogenic enzyme adrenal 707
Actin
ADP polymn kinetics ATP 13061
assembly cytochalasin mechanism 5549
assembly vinculin 3916
binding myosin kinase phosphatase 7740
binding myosin subfragment enthalpy 10303
binding phosphoprotein subunit Physarum 5208
binding protein intestine ATPase 14128
binding tropomyosin erythrocyte membrane 5978
bundling caldesmon smooth muscle 12873
crosslinking protein calcium Dictyostelium 4514
F ATP hydrolysis polymn 1441
filament ATP cap 9983
filament microtubule assocd protein 11730
gelsolin binding cation fluorescence 7480
gelsolin complex platelet activation 7473
gene expression Drosophila ecdysterone 1738
isoform spleen 3949
lysine modification pentanedione tropomyosin 11014
mRNA Naegleria differentiation 7355
multiple form Naegleria 7349
myosin subfragment 1 ATPase mechanism 11908 11920
myosin subfragment 1 complex stoichiometry 7363
polymn crit concn ATP ADP 6274
polymn crosslinked trimer ionic strength 8794
polymn filament elongation brevin 11868
polymn fragmentation random walk mechanism 9987
variant smooth muscle 14383
Actinomycetes
cystathionine lyase 10393
Actinomycin
DNA hexamer crystal 4714
formation Streptomyces acyl pentapeptide lactone 8226
Activator
plasminogen diabetes mellitus 2976
Active
center hydrogenase Clostridium 14328
site amino acid oxidase histidine 5585
site aspartate transcarbamoylase quaternary structure 13906
site aspartate transcarbamoylase tyrosine 11180
site ATPase adenine nucleotide analog 2961
site ATPase benzoyl ATP deriv 3612
site ATPase myosin Acanthamoeba 14184
site carboxyl ethanolamine ammonialyase 7652
site cytochrome b5 reductase crosslinking 3275
site cytochrome P450 reductase tyrosine 2480
site dihydrofolate reductase Neisseria 12299
site ferrochelatase sulfhydryl modification 2711
site flavoprotein thioflavin probe 9667
site fructose phosphate kinase liver 8366
site glutamine phosphoribosylpyrophosphate amidotransferase 14230
site glyoxalase I ligand conformation 11436
site hydroxyproline epimerase sequence 249
site isocitrate dehydrogenase subunit 11936
site isomaltase sea lion 4878
site phosphofructokinase fructose diphosphatase 949 14023
site probe flavoenzyme thioflavin 13355
site protocatechuate dioxygenase ligand binding 4487
site ribulose diphosphate carboxylase 3102
site sequence ATPase kidney 9532
site steroid isomerase Pseudomonas 9096
Actomyocin
ATPase regulation Asquipecten Loligo 2617
Actomyosin
ATPase inhibition caldesmon smooth muscle 13656
ATPase inhibition tridecylresorcylate 15007
ATPase interaction tropomyosin 2070
ATPase modulation fodrin calcium 6306

ATPase regulation troponin C 9017
subfragment 1 interaction ADP heart 5045
Acute
phase protein formation 7331
phase protein liver genetics 566
Acyclovir
purine nucleoside phosphorylase 4065
triphosphate herpes DNA polymerase 9575
Acyl
carrier protein phosphopantetheine Escherichia 1891
CoA dehydrogenase crystal structure liver 3318
CoA dehydrogenase liver 1789
CoA interaction citrate synthase 1423
CoA oxidase cDNA rat cloning 2031
CoA oxidase formation transport peroxisome 6397
Acylation
calmodulin essential lysine 14985
cysteine transmembrane histocompatibility antigen 7230
fatty protein embryo Strongylocentrotus 4934
glycoprotein vesicular stomatitis virus 4699
membrane protein Mycoplasma phospholipid 10771
mucus glycoprotein palmitate stomach 11997
phospholipid Tetrahymena cold 8706
protein tetradecanoate tetradecanoyl CoA Photobacterium 1409
rhodopsin palmitate retina 5054
transferrin receptor reticulocyte membrane 15460
Acylcarnitine
transport mitochondria mechanism 9082
Acylkanosamine
Mycobacterium lipooligosaccharide antigen 9729
Acyltransferase
arylhydroxamate liver 12128
carnitine liver peroxisome 13089
cholesterol compd 58035 815
dihydroxyacetone phosphate multiple form liver 9064
Escherichia phosphatidylethanolamine fatty acid 6188
fatty mucus glycoprotein gastric mucosa 13304
glycerol phosphate reconstitution liposome 14688
lecithin cholesterol reaction discoidal substrate 6369
monoacylglycerol liver rat newborn 8934
AD
143 leukemia DNA transcription 11391
Adductor
muscle myosin light chain proteolysis 13534
Adenine
metab Leishmania 14617
nucleotide analog ATPase active site 2961
nucleotide calcium efflux sarcoplasmic reticulum 2365
nucleotide carrier transport mitochondria 3487
nucleotide phosphoenolpyruvate formation mitochondria 10904
nucleotide translocase heart protein 12742
nucleotide translocase liver development 8737
nucleotide transport creatine kinase mitochondria 8246
nucleotide transport liver mitochondria 154
Adeno
assocd virus cloning recombination 4661
Adenocarcinoma
difucoganglioside antibody 10511
fucolipid carbohydrate structure 4672
fucosylated glycolipid monoclonal antibody 4681
mammary ascites sialoglycoprotein oligosaccharide structure 4866
Adenosine
cyclic phosphorothioate glucagon glycogenolysis 8151
deaminase binding protein antibody 12844
deaminase binding protein fibroblast 9832
deaminase cDNA sequence human 12101
deaminase lymphoblast deoxyATP metab 15178
deaminase Plasmodium 1472
diphosphate
See ADP
fluorosulfonylbenzoyl conformation enzyme binding 1454
monophosphate
See AMP
phosphate phosphosulfate transport Golgi 3554 4263
phosphosulfate kinase Penicillium 2113
thiotriphosphate DNA replication initiation complex 4589
thiotriphosphate interaction succinyl CoA synthetase 9642
triphosphate
See ATP
Adenosylhomocysteine
hydrolase lymphocyte deazaadenosine 1122
hydrolase neplanocin 4353
Adenosylmethionine
homocysteine serine hydroxymethyltransferase regulation 8402
synthetase gene sequence Escherichia 14505
transmethylation transsulfuration aminopropylation 4205
Adenovirus
DNA polymerase 9487
DNA replication protein pL HeLa 7815
early region mRNA translation 7016
gene DNA replication protein 7807
hexon gene sequence 6431
late promoter RNA polymerase II 2236
protein IVa2 gene transcription 11527
protein V VII gene sequence 13960
tumor antigen DNA synthesis protection 11777
2 chromium release KB cell 14350
2 hexon protein gene sequence 13976
2 late promoter transcription 8513
2 protein gene sequence 13968
7 DNA binding protein 5003
Adenyl
cyclase adrenergic receptor 15464
cyclase desensitization glucagon 7893
Adenylate
cyclase adipocyte forskolin binding 7630
cyclase adipose stimulation GDP 7038
cyclase binding guanine nucleotide 3560
cyclase calmodulin stimulated abalone sperm 7590
cyclase catecholamine butyrate 4910
cyclase component ADP ribosylation diosen 6235
cyclase component protein Gi lymphoma 3586
cyclase component protein Ni purifn 14222
cyclase desensitization catecholamine 4629
cyclase desensitization glucagon 7747
cyclase erythrocyte desensitization adreneoceptor 9742
cyclase forskolin resistance ACTH 5376 9965
cyclase GTP binding protein ADPribosylation 15320
cyclase GTP protein catecholamine 9351
cyclase guanine nucleotide binding 3568 3578
cyclase liver angiotensin 7622
cyclase muscle development isoproterenol 7294
cyclase pertussis toxin 9693
cyclase pertussis toxin ribosylation 1086
cyclase prostacyclin receptor 12431
cyclase protein cofactor liver membrane 6228
cyclase protein Gi GTPase rhodopsin 7378
cyclase receptor GDP adipocyte 761
cyclase reconstitution phosphatidylcholine liposome 9979
cyclase regulation protein GTP analog 11406
cyclase regulator adipocyte hypothyroidism 3254
cyclase regulatory component purifn erythrocyte 5871
deaminase interaction myosin subfragment 60
kinase heat sensitive Escherichia mutant 8713
oligomer RIA 1727
trimer tobacco mosaic virus 3482
Adenylosuccinate
synthetase mechanism phosphoryl IMP 12330
synthetase mechanism stereochem 3044
Adenylyl
cyclase GTP 15447
cyclase interaction protein Ns Ni 13178
cyclase regulatory protein subunit erythrocyte 2039
Adenylylsulfate
kinase Penicillium 2113
Adenylyluridylate
diphtheria toxin specificity NAD 15159
interaction diphtheria toxin 15154
Adheron
embryo retina monoclonal antibody 4031
Adhesion
Escherichia fibronectin receptor 14899
fibroblast heparan sulfate proteoglycan 212 6773
lung macrophage mannose receptor 1764
Adipocyte
adenylate cyclase regulator hypothyroidism 3254
cAMP analog protein kinase 3539
differentiation lipogenic enzyme 4827
fatty acid permeation protein 8945
forskolin binding adenylate cyclase 7630
GDP adenylate cyclase receptor 761
glycogen synthase vanadate 6650
hexose transporter insulin 8125
insulin receptor autoregulation 6376
insulin receptor metab 6511
lipolysis inhibition insulin 7701
membrane lipoprotein binding metab 10168
Adipose
adenylate cyclase stimulation GDP 7038
adrenergic receptor purifn 1344
differentiation fatty acid metab 3844
glucose phosphodiesterase insulin cation 9520
growth hormone receptor 1099
insulin receptor antibody 6416
insulin receptor internalization 11083
insulinlike growth factor receptor 8378
membrane protein insulin 12112
uncoupling protein mRNA norepinephrine 11583
ADP
actin polymn kinetics ATP 13061
activation hydroxymethylglutaryl CoA reductase kinase 2810
ATP actin polymn crit concn 6274
ATP PEP formation mitochondria 10904
ATP ratio octanoate activation mitochondria 5490
carrier precursor transport mitochondria 3487
etheno ATPase myosin sulfhydryl modification 8786
glyceromannoheptose isolation Salmonella Shigella 11858
interaction actomyosin subfragment 1 heart 5045
platelet shape myosin phosphorylation 9826
regulation cation transport ATPase 11861
ribosyl protein lyase liver 986
ribosylation adenylate cyclase component dissocn 6235
ribosylation adenylate kinase pertussis toxin 15320
ribosylation factor adenylate cyclase component 6228
ribosylation histone hepatoma DNA repair 890
ribosylation inhibition endonuclease semen plasma 6579
ribosylation islet activating protein 13863
ribosylation protein hepatoma dimethyl sulfate 6841
ribosylation site tranducin cholera toxin 696
ribosylation transducin cholera toxin 6686
ribosyltransferase inactivation glutamine synthetase 5100
ribosyltransferase liver 2022
ribosyltransferase transducin asparagine 749
site isocitrate dehydrogenase affinity labeling 12481
succinate succinyl CoA exchange 2144
translocator rotational diffusion mitochondria 3037
transport creatine kinase mitochondria 8246
transport liver mitochondria 154
ADPribosylation
poly DNA topoisomerase inhibition 547
poly histone H1 crosslinking 7963
Adrenal
adenylate cyclase forskolin ACTH 5376
chromaffin vesicle cytochrome b561 4885
chromogranin 3237
chromogranin mRNA pituitary pheochromocytoma 11597
cortex cytochrome P450 reconstitution 2991
cortex protein kinase hormone 3403

corticosteroid formation ACTH 10159
medulla Golgi protein PAPS 11153
microsome cytochrome P450 3971
mitochondria phospholipid ACTH 10745
precytochrome P450scc processing mitochondria 8672
pregnenolone formation cholesterol oxygen 1174
steroidogenic enzyme cAMP 707
tyrosine hydroxylase activation stress 9269
Adrenergic
receptor adenylate cyclase desensitization 4629
receptor calcium transport muscle 7554
receptor carbohydrate chain 8655
receptor catecholamine 2227
receptor catecholamine desensitization 11844
receptor desensitization isoproterenol cAMP 15115
receptor erythrocyte trypsin 4389
receptor glucose metab heart 15204
receptor kidney pertussis toxin 8076
receptor phosphorylase hepatocyte 15464
receptor phosphorylation adenylate cyclase 9742
receptor [illegible]n adipose 1344
receptor solubilization deoxycholate 5803
receptor subunit photoaffinity probe 2579 5355
receptor subunit platelet 7864
Adrenoceptor
adenylate cyclase erythrocyte desensitization 9742
beta fat cell hypothyroidism 3254
ligand binding calcium mobilization 12519
liver calcium transport 12322
Adrenodoxin
carboxyl group modification 2155
formation ovary FSH 8572
interaction reductase cytochrome P450scc 10025
precursor processing mitochondria 8672
Adriamycin
deriv antitumor mechanism 11391
iron complex oxygen redn 6056
Adsorption
affinity assay glucagon receptor 9285
Aedes
asparagine linked oligosaccharide processing 2375
Aequipecten
actomyocin ATPase regulation 2617
Aerotaxis
Salmonella protomotive force 10983
Affinity
adsorption assay glucagon receptor 9285
chromatog acetylcholinesterase erythrocyte 5643
chromatog ATPase sarcoplasmic reticulum 14249
chromatog calcium pump ATPase 15540
chromatog phosphotyrosine protein phosphatase 11383
chromatog protein kinase C 12311
chromatog quinacrine binding protein axon 13241
chromatog thymidine kinase 8012
column prolactin receptor purifn 6942
labeling calmodulin phenothiazine deriv 10136
labeling cholecystokinin receptor 14818
labeling isocitrate dehydrogenase ADP site 12481
labeling luciferase aldehyde site Vibrio 10754
labeling ribulose diphosphate carboxylase 3102
radiolabeling methotrexate transporting protein 4558
Aflatoxin
benzopyrene cytochrome P450 12495
Afrikander
cattle goiter thyroglobulin mRNA 10507
Agglutinin
Datura acetyllactosamine oligosaccharide 6253
soybean carbohydrate binding kinetics 7067
Aggregate
proteoglycan link protein cartilage 5361
Aggregation
Hb oxygen binding bullfrog 2610
neutrophil eicosaspentaenoate lipoxygenase deriv 2383
platelet glycoprotein fibrinogen domain complex 8584
Agrocinopine
A mol structure 9704
AIV
prespolipoprotein formation 468 4008
AKR
leukemia protein formation ricin 11496
Alanine
carrier protein PS3 bacteria 10653
glycoxylate aminotransferase liver embryo 14498
transport liver membrane 10614
Alanyl
tRNA synthetase Bombyx 4043
Albers
ATP hydrolysis 15228
Albumin
binding pyridoxal 5833
copper chelate immunosuppression 7602
fatty acid binding probe 5411
hepatocyte SV40 virus infection 9595
PGE2 interaction 2722
phosphodiesterase photoactivation inhibition rod 14567
serum glycosylation conformation function 3812
Alc
amino acid transport hepatocyte 11430
glycosphingolipid sulfotransferase stomach 5792
oxidase assembly peroxisome Candida 8485
oxo cuticle moth 8452
Alcaligenes
ribulose diphosphate carboxylase conformation 4463
Alcohol
dehydrogenase
See also Dehydrogenase
Aldehyde
dehydrogenase interaction magnesium 4922 4927
dehydrogenase isoenzyme liver 11986 11991
dehydrogenase moth pheromone metab 475
dehydrogenase Vibrio fatty acid redn 7109
oxo cuticle moth 8452
pterin xanthine oxidase inactivation folate 10784
site luciferase affinity labeling Vibrio 10754
Aldolase
A cDNA sequence rabbit 1127
assocn enzyme membrane erythrocyte 9374
B mRNA organ diet 1798
B sequence rat liver 14572
fructose diphosphate anaerobic expression maize 14180
inactivation glutathione disulfide 8886
isoenzyme spinach cytosol chloroplast 1011
kinetics crystal state muscle 10222
sequence blocked amino terminus muscle 1132
Aldose
ketoamine linkage protein reversibility 4372
Aldosterone
formation calcium 8863
secretion angiotensin calcium 14448
sodium transport kidney 11221
Aldosteronism
carbonic anhydrase erythrocyte glutathione 15517
Alk
phosphatase binding chloride NMR 11036
phosphatase cadmium binding arsenate NMR 4987
phosphatase cadmium binding phosphate 3625
phosphatase cartilage mineralization 922
phosphatase epithelium membrane organization 574
phosphatase intestine phosphorus deficiency 11658
phosphatase mixed metal complex NMR 4991
phosphatase placenta choriocarcinoma butyrate 2526
phosphatase trypsin modification Escherichia 729
phosphatase tunicamycin 14997
phosphatase vanadate ion transport 3511
Alkaloid
inhibitor glycoprotein processing 12409
Alkyl
nitrite oxidn Hb kinetics 80
Alkylarachidonoyl
glycerophosphocholine metab platelet activating factor 12014
Alkynoate
inactivation fatty acid hydroxylase 4136
Allosteric
transition phosphofructokinase x ray scattering 3124
Alloxyme
lactate dehydrogenase kinetics Fundulus 1309
lactate dehydrogenase purifn Fundulus 1299
Alpha
factor Saccharomyces cell division 1004
subunit pituitary hormone oligosaccharide 2662
Alpha2u
globulin formation organ 12803
Alteromonas
BAL31 exonuclease RNA duplex hydrolysis 13584
Amethopterin
inhibition xanthine oxidase spleen 12
Amidation
MSH intermediate pituitary ascorbate 13041
sleep promoting factor activity 12659
Amidinotransferase
arginine glycine kidney creatine 12034
Amidotransferase
glutamine phosphoribosylpyrophosphate active site 14230
glutamine phosphoribosylpyrophosphate Saccharomyces 8478
Amiloride
fibroblast DNA growth factor 4313
ouabain heart ion exchange 8880
Amin[illegible]
chlorination neutrophil 10404
drug brain phosphatidylinositol 2764
lysosomotropic immunotoxin cytotoxicity 9359
oxidase plasma inactivation sulfide 2923
Amino
acid deriv inactivation kynureninase 10669
acid lymphoblast purine formation 2936
acid neuroblastoma polyamine transport 4750
acid oxidase active site histidine 5585
acid partition cyclohexylpyrrolidone water 2910
acid substitution apolipoprotein AI 3070
acid transport brain ammonia 5295
acid transport fibroblast cortisol 11464
acid transport hepatocyte ethanol 11430
acid transport hepatoma dexamethasone 394
acid transport liver glucagon 3519
acid transport muscle insulin 2337
acid transport pituitary triiodothyronine 5726
acid transport system ASC 3648
acid transport vacuole membrane Saccharomyces 11505
acid tryptophan synthase subunit conformation 14076
acid vacuole Neurospora polyphosphate 5152
terminus labeling protein 15572
Aminoacyl
tRNA affinity elongation factor EFTu 5010
tRNA binding codon anticodon mismatch 5632
tRNA virginiamycin M peptidyltransferase 9563
Aminoadipic
semialdehyde synthase familial hyperlysinemia 11643
Aminobutyrate
aminotransferase interaction dehydrogenase 11459
Aminofluorene
oxidn prostaglandin synthase peroxidase 13885
Aminobenzanoate
oligomer hydrolase gene evolution Flavobacterium 13648
Aminohydrolase
AMP metab hepatocyte 4365
AMP metab liver spleen 4359
Aminoisobutyrate
transport muscle multiplication stimulating activity 3090
Aminopeptidase
leucine crystal structure kidney 14757
Aminopicolinate
gluconeogenesis phosphoenolpyruvate carboxykinase 6920
Aminopropanol
dehydrogenase Escherichia 2124
Aminopropylation
adenosylmethionine 4205
Aminopurine
cytosine base mispair 11713
Aminotransferase
alanine glycoxylate liver embryo 14498
aminobutyrate interaction dehydrogenase 11459

aspartate isoenzyme NMR histidine 3877
aspartate subunit independence mitochondria 7003
ornithine formation hormone 2302
phenylpyruvate pancreas mitochondria 3043
tyrosine methylthioinosine cytotoxicity 929
tyrosine organ specificity 386
Ammonia
amino acid transport brain 5295
chloramine bactericide cytotoxicity neutrophil 10404
glutamine synthetase inactivation 12054
glycine cleavage enzyme intermediate 10664
potassium methane formation bacteria 12602
Ammonialyase
ethanolamine active site carboxyl 7652
Amnion
membrane lysophospholipase 15188
AMP
aminohydrolase metab hepatocyte 4365
aminohydrolase metab liver spleen 4359
binding site phosphorylase 9384
nucleosidase activation isotope effect 9418
nucleosidase gene Escherichia mapping cloning 6972
Amphibian
RNA formation factor embryo 11373
Amphiphile
sodium calcium exchange sarcolemma 13999
Amphiphilic
protein mol wt detn 11682
Amphiuma
oxygen transport erythrocyte 12619
Amylase
gene mapping barley 13637
gene mRNA barley gibberellate 12234
pancreas gene regulation diabetes 12216
secretion muscarinic receptor pancreas 294
Amyloid

uncoupling protein mRNA norepinephrine 11583
Thermophilus
isopropylmalate dehydrogenase gene sequence 2956
Thermus
cytochrome isolation structure 112
cytochrome oxidase kinetics 1031
DNA ligase 10041
iron sulfur protein 124
superoxide dismutase crystal structure 10695
Thiamin
pyrophosphate pyruvate dehydrogenase bromopyruvate 2905
pyrophosphate succinyl formation ketoglutarate dehydrogenase 4023
thiazolone diphosphate interaction pyruvate decarboxylase 8960
Thiocesterase
role fatty acid synthetase 3605
Thioether
link phycoerythrobilin phycoerythrin Porphyridium 5481 5485
Thioflavin
flavoenzyme active site probe 13355
property flavoprotein active site 9667
Thiol
beta lactamase plasmid pBR322 mutant 5327
binding chloroperoxidase 13209
disulfide exchange peptide free energy 7468
hydrophobic binding site lectin 4777
inhibition glutathione peroxidase 1043
lima bean lectin carbohydrate 903
protease liver leupeptin 5937
proteinase inhibitor sulfhydryl redox 13832
reaction lactoperoxidase compd II 7080
Thiolase
ketoacyl CoA formation transport peroxisome 6397
Thioredoxin
f Anabaena 14088
gene Escherichia cloning 10469
reductase deaza FAD Escherichia 2243
Thiotriphosphate
adenosine interaction succinyl CoA synthetase 9642
Thiyl
radical cysteine oxidn peroxidase 5606
Threonine
Escherichia aspartate 15331
signal peptide lipoprotein Escherichia 6195
Threonyl
tRNA synthetase CHO borrelidin 9202
tRNA synthetase phosphorylation CHO cell 11160
tRNA synthetase repression Escherichia 5232
Thrombin
activation platelet antibody protein 9121
alpha beta interaction fibrinogen 6991
beta gamma structure human 5691
binding macroglobulin 1272
fibroblast pH 5809
inactivation protein S 10335
inhibition antithrombin III heparin size 5670
inositol phosphate formation platelet 13199
microvessel bound reaction antithrombin 4335
neuron cGMP 9078
platelet activation 8286
platelet binding protein 5388
platelet cation transport 1502
platelet fibrin assocn cytoskeleton 5247
platelet phosphatidylcholine metab 9369
sodium proton antiport 10989
vein von Willebrand factor 13329
Thrombomodulin
placenta 12246
Thrombospondin
heparin binding domain platelet 10100
structure heparin binding peptide 3944
Thylakoid
binding chloroplast coupling factor ATPase 11121
Thymidine
aldehyde oxygen neocarzinostatin DNA 9975
CHO cell mutator gene 2355
kinase affinity chromatog Physarum 8012
sensitive lymphoma mutant 3782
Thymidylate
kinase gene CDC8 Saccharomyces 11052
kinase Saccharomyces nucleus cytoplasm 14394
synthase cDNA human transformation 14361
synthase gene mouse cloning 7206
synthetase ternary complex UV spectra 11346
Thymine
glycol DNA glycosylase Escherichia 5543
Thymus
casein kinase structure homol Drosophila 9001
DNA polymerase primase complex 14679
DNA transcription RNA polymerase II 2509 2517
galactosyltransferase branch specificity 15131
glucocorticosteroid receptor complex 820
protein kinase HMG protein 13495
topoisomerase poly ADPribosylation 547
Thyroglobulin
galactosyl oligosaccharide localization mammal 9858
iodination oxidn thyroid peroxidase kinetics 359
mRNA goiter Afrikander cattle 10507
Thyroid
carcinoma procalcitonin sequence 2870
hormone development myosin 12092
hormone EGF receptor 6543
hormone heart myosin gene regulation 6437
hormone myosin heart development 12628
hormone receptor cholera toxin 6110
hormone receptor core histone 10941
hormone receptor half life butyrate 12064
hormone receptor somatotropin gene 12377
hormone responsive gene rat 7253
myosin 15564
peroxidase lactoperoxidase iodide mechanism 13783
peroxidase thyroglobulin iodination oxidn kinetics 359
sulfoglycoprotein formation 4710
Thyrotropin
chromosome protein phosphorylation 601
subunit cDNA sequence cattle 5024
Thyroxine
binding globulin hepatoma 13605
binding globulin secretion hepatoma 13610
receptor core histone 10941
Tiazofurin
antitumor IMP dehydrogenase 5078
Time
resolved fluorescence fluorophore protein 10967
Tissue
adhesion Escherichia 14899
choline kinase 14706
enkephalin convertase detn guanidinoethylmethylmercaptosuccinate 11812
homocysteine detn 2360
membrane lactate binding protein 15264
plasminogen activator inhibitor complex 3644
transglutaminase macrophage retinoate 12794
Tobacco
hornworm homolymph insecticyanin sequence 13159
mosaic virus adenylate trimer 3482
Tocopherol
inhibition methyl linoleate oxidn 4177
phosphate phenylalamine hydroxylase activation conformation 14560
Tomato
proteinase inhibitor inducing factor 13172
Topoisomerase
DNA antitumor ellipticine 9182
DNA antitumor epipodophyllotoxin 13560
DNA chromosome origin replication Escherichia 8578
DNA I II Saccharomyces 10422
DNA inhibition poly ADPribosylation 547
DNA mutant Saccharomyces 1375
DNA site specificity phage T4 5339 5347
DNA subunit phage T4 9177
I DNA catenation exonuclease III 4576
Torpedo
acetylcholine receptor binding bungarotoxin 11512
Toxin
adenylate cyclase receptor 761
Centruroides tetrodotoxin receptor 6074
cholera ADP ribosylation site tranducin 696
cholera ganglioside Leydig tumor 7983
cholera thyroid hormone receptor 6110
cholera transducin ADP ribosylation 6686
crystal structure transition Centruroides 12081
diphtheria adenylyluridylate specificity NAD 15159
diphtheria insertion membrane 12226
diphtheria interaction adenylyluridylate 15154
diphtheria membrane transport cysteine 1649
diphtheria protein AKR leukemia 11496
Leiurus batrachotoxin receptor 6117
Naja acetylcholine receptor method 5717
pertussis ADP ribosylation adenylate kinase 15320
pertussis adrenergic receptor kidney 8076
pertussis calcium mobilization neutrophil 13863
pertussis dopamine receptor 8693
pertussis inhibition GTPase retina 1378
pertussis ribosylation adenylate cyclase 1086
pertussis transducin retina 23
Phytolacca ribosome inhibiting protein 15252
scorpion binding brain 1676
TPA
protein phosphorylation hepatoma 897
Trachea
acetylglucosamine galactosyltransferase 8045
glycoprotein oligosaccharide structure mucin 12906
mucin glycoprotein oligosaccharide structure 12899

Transacylase
dihydrolipoyl kinetics structure 9277
platelet activating factor metab 13316
Transacylation
arachidonate blood platelet CoA 2403
Transamidinase
kidney creatine 12034
Transaminase
aspartate cytosol proteolysis 723
Transcarbamoylase
aspartate active site quaternary structure 13906
aspartate active site tyrosine 11180
aspartate Escherichia mutant 11027
aspartate subunit regulation catalysis 12672
aspartate zinc release mercurial 14793
ornithine Saccharomyces 5139
Transcarbamylase
ornithine formation subunit assembly mitochondria 5392
preornithine processing mitochondria adrenal cortex 8672
Transcription
antithrombin III gene human 15386
arginine tRNA gene Drosophila 1461
attenuation tryptophan operon Serratia 12838
DNA initiation energy requirement 5321
DNA leukemia AD 143 11391
DNA RNA polymerase II thymus 2509 2517
factor DNA oocyte Xenopus 11373
factor purifn monoclonal antibody 11587
factor RNA polymerase III HeLa 1934
factor 5S RNA gene property 6158
gene guanosine tetraphosphate Escherichia 1951
gene hsp70 Drosophila 14812

gene var1 yeast mitochondria 6019
glutaminyl tRNA synthetase gene Escherichia 9953
human placental lactogen gene 14642
Ig light chain gene chromatin 8534
lambda promoter Escherichia rho factor 8664
late promoter adenovirus 2 8513
leucine tRNA gene Saccharomyces 5990 7955
phage T3 RNA polymerase 1993
promoter sigma RNA polymerase Bacillus 8619
protein IVa2 gene adenovirus 11527
RNA I promoter DNA supercoiling 11184
termination rho dependence Escherichia 2268
tryptophan operon leader Escherichia 11550
Transducin
adenylate cyclase protein Gi rhodopsin 7378
ADP ribosylation cholera toxin 696 6686
ADP ribosylation islet activating protein 749
retina pertussis toxin 23
sulfhydryl group rod outer segment 6694
Transfer
fatty acid liposome protein 13395
Transferase
glutathione cDNA sequence rat liver 5182 5536
glutathione gene rat liver 9434
glutathione inhibition product analog EPR 714
glutathione interaction propylthiouracil liver 7409
glutathione multiple form 12444
phosphoglycerol I Escherichia 8388
S glutathione anionic form liver 12449
Transferrin
hydroxyl radical formation 13391
plasma erythrocyte ferritin development 779
receptor acylation reticulocyte membrane 15460
receptor antibody reticulocyte transport 1398
receptor erythroleukemia differentiation 9944
receptor externalization reticulocyte 9776
receptor formation iron K562 2689
receptor HeLa heme 13235
receptor K562 cell iron 12970
receptor regulation leukemia 11576
recycling K562 cell Golgi 14762
reticulocyte receptor iron transfer 1866
ricin conjugate cytotoxic 1143
Transformation
fibroblast protein extracellular matrix 11563
human thymidylate synthase cDNA 14361
malignant oligosaccharide cell membrane 10834
neoplastic hyaluronate cell surface 9440
SV40 virus hepatocyte albumin 9595
virus fibroblast protein formation 12135
Transforming
growth factor isolation characterization 9756
growth factor melanoma 11895
growth factor receptor fibroblast 10995
protein catalytic domain sarcoma virus 4550
Transglutaminase
macrophage retinoate 12794
specificity glutamine peptide 9007
Transglycosylase
penicillin binding protein 13937
Transhydrogenase
component NADH ubiquinone reductase 5124
nicotinamide nucleotide heart mitochondria 8626
pyridine nucleotide mechanism heart 5945
Transition
state analog protocatechuate dioxygenase 4476
Translation
early region mRNA adenovirus 7016
initiation factor IF3 NMR 9628
mRNA helix destabilizing protein 15597
repression replicase gene phage f2 20
RNA cowpea mosaic virus 3197
thyroxine binding globulin mRNA 13605
Translocase
adenine nucleotide heart protein 12742
adenine nucleotide liver development 8737
carnitine acylcarnitine mechanism 9082
Translocator
ATP rotational diffusion mitochondria 3037
monocarboxylate liver gluconeogenesis 7525
Transmembrane
site recruitment protein erythrocyte 6481
Transmethylation
adenosylmethionine 4205
Transpeptidase
glutamyl epithelium membrane organization 574
glutamyl formation processing hepatoma 7970
glutamyl formation processing kidney 678 4687
penicillin binding protein 13937
Transport
acylcarnitine mitochondria mechanism 9082
adenine nucleotide carrier mitochondria 3487
adenine nucleotide creatine kinase mitochondria 8246
adenine nucleotide liver mitochondria 154
adenosine phosphate phosphosulfate Golgi 3554
amino acid fibroblast cortisol 11464
amino acid liver glucagon 3519
amino acid pituitary triiodothyronine 5726
amino acid system ASC 3648
amino acid vacuole membrane Saccharomyces 11505
ammonia amino acid brain 5295
apocytochrome c lipid membrane 6704
apocytochrome c mitochondria model 4147
arginine histidine yeast membrane 11509
aspartate glutamate erythrocyte sodium 312
bile acid basolateral membrane 9295
calcium ATPase energetics sarcoplasmic reticulum 1629
